**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

This Office Action is responsive to the applicants' amendment filed on September 28, 2004.

Claims 4, 5 and 7 have been amended. Overall, claims 1-7 are pending in this application. Applicants' cooperation in correcting the informalities in the specification is appreciated.

#### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Douzono et al. (Douzono) (Patent Number 6,551,082).***

Regarding claim 1, as shown in Fig. 1, Douzono discloses a two-stage screw compressor comprising two compressor stages (1, 2) that are parallel with respect to one another, each compressor stage having a pair of screw rotors (not numbered; however, clearly seen in Fig. 1) that mesh together and are located in a respective rotor housing, each of the two rotor housings (5, 7) being surrounded by a coolant housing (1b, 2b) and being cooled by coolant that flows inside of the coolant housing, both rotor housings being enclosed at a distance by the coolant housing and the coolant housing having a coolant inlet (not numbered; however, clearly seen in Fig. 1) and a coolant outlet (not numbered; however, clearly seen in Fig. 1) designed such that

Art Unit: 3748

the coolant that flows from the inlet to the outlet passes around and cools both rotor housings (1, 2).

Regarding claim 2, 3 and 6, Douzono further discloses the coolant first passes around and cools essentially one rotor housing and then the other rotor housing along its flow path from the inlet to the outlet (see col. 5, line 59-67 and col. 6, line 1-5); the coolant first flowing around the rotor housing of the first compressor stage (1) and then the rotor housing of the second compressor stage (2); the rotor housings being designed as an integral block in one piece with at least a section of the coolant housing.

***Allowable Subject Matter***

2. Claims 4, 5 and 7 are allowed.

***Response to Arguments***

Applicant's arguments filed on have been fully considered but they are not persuasive.

With regard to applicant's argument that Douzono et al. (Douzono) does not disclose each of the two rotor housings being surrounded by a coolant housing. The examiner respectfully disagrees with this position. Douzono teaches each of the rotor housings (1c, 2c) being surrounded by a coolant housing (1b, 2b) (see Fig. 1).

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the two rotors housings are not surround by a coolant housing) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
